

To Whom It May Concern:

I live in a signal challenged area and I travel a 400 mile radius regularly to conduct my business. I see XM Radio and their competitive suppliers as a mission critical essential to our business and we depend upon their National traffic and weather forecasts to plan our sales and marketing trips. I would look upon any curtailing of this VITAL service as an infringement upon my rights as an American to avail myself of valuable and important information. I would ask that you remind the various lobbyists from the networks that the air ways are still the property of the American people and that WE THE PEOPLE will determine what will or will not be broadcast over them. I strongly request that your agency advocate for the people and reject any attempt by these corporate interests to limit our freedoms of speech and our access to mission critical information.
